

## TECHNICAL DATA SHEET

### PLASTISOL POLY WHITE INK

PL Poly White is a phthalate-free, plastisol-based printing base used to achieve an elastic, soft-touch, and white coverage effect in textile printing. Its washing fastness is high.

#### Highlights

- Suitable for use as an underbase flash white or as a highlight white.
- Excellent hand, coverage, and fiber-matte down.

#### Printing Tips

- Before use, please stir the product well. Do not use any additives that are not advised.
- Use consistent, high-tensioned screen mesh and sharp edged squeegees for best print results.
- Use a printing technique to assure a good ink deposit to maximize bleed resistance and film strength properties.
- Depending on flash unit, a 2-3 second flash is adequate.

#### Compliance

- Phthalate free ink.
- Prop 65.

#### Precautions

- After using, the screen should be cleaned with synthetic thinner or plastisol screen opener.
- The technical application and information that have been given above, are designed only as using instructions. Should not be considered as a warranty for any other use. If any further help or assistance is required, our technical department is ready for help.
- In case of emergency, Safety Data Sheet of this product should be ready for help at the working area.
- The safety data sheets are intended to provide detailed and comprehensive information about the products. In cases of improper or nonconforming use, the manufacturer/distributor cannot be held liable for any direct or indirect losses or damages.
- Email [info@enormeink.com](mailto:info@enormeink.com) for any questions or more information.

## Recommended Parameters

**Fabric Types**  
Polyester

**Mesh**  
Counts: 34-62 T mesh / 86-158 US

**Squeegee**  
Durometer: 60-80 Shore  
V type dr. blade

**Cure Temperatures**  
302°F(150°C) for 1.5 minutes

**Additives**  
Do not use any additives that are not advised.

**Shipping & Storage**  
41°F - 86°F (5°C - 30°C)

**Clean Up**  
Synthetic Thinner or  
Plastisol Screen Opener

**Health & Safety**
